INTRODUCTION TO LOGISTIX

The Logistix plug-in by the Dynamix Dox DMS is designed to manage business data, event logistical fleet processes.

Logistix is a must for the logical flow of events to be linked to supporting documentation such as inspection sheets, delivery notes and so on. With Logistix businesses can invoice customers accurately and with peace of mind. Not only does this improve cashflow, but it also eradicates the frustration of late invoicing or invoice queries.

The Mobile client feature allows completion of documentation off-site by using your mobile device to capture and deliver files securely to the control centre. No longer are companies required to purchase expensive hardware devices, as any Android Smart device can be used. All administration can be submitted within real-time, while a fleet is en route. This ensures for guaranteed timely deliveries, with the correct merchandise on board - delivery after delivery.

More than just making existing data digital, digitalization embraces the ability of digital technology to collect data, establish trends and make better business sense. Digitalization allows for an elevated customer experience and assists to bring more value to partners: consequently, creating an effective ecosystem of supply chain providers. Manufacturers, carriers, freight forwarders and others in the transportation sector benefit from this solution through streamlined workflows and accessible data to all teams and management levels. Once Logistix is implemented, a business can use the data to make quick, informed decisions propelling business forward.

BENEFITS OF LOGISTIX

Costly Error Decrease

Cost is by far one of the greatest concerns pertaining to logistics and the travel of freight. Logistix can be integrated with an existing ERP system and address book, effectively streamlining data and processes. This seamlessly creates uninterrupted flow within a company. Given that Logistix eliminates the manual entry of data, it rules out human error which, ultimately, leads to cost reduction and enhanced transportation of cargo to customers.

Customer Service Increase

Failure to deliver on time, could be the reason why customers will look to other competitors that will be able to fulfil their needs, in time and on time. With the logistical flow of events digitized, Logistix positions you to confidently serve your customers with excellent service.

Managing Custom Process

The Logistix plug-in allows automation of any custom process with minimal development. Rapid deployment of features is one of the key benefits of the module.

Real-Time Data

By far one of the main benefits of Logistix is the real-time data which provides thorough visibility into the operation and enables you to make informed business decisions based on your company trends and history. Access to valuable data at your fingertips will provide you with the power to plan smarter deliveries, with different routes to mitigate future uninformed decisions and confidently plan fleet operation.

KEY FEATURES OF LOGISTIX

1. Document management
2. Process management
3. Development for additional processes
4. Integration
5. Reporting
6. Smart phone compatible
